

Acousto-optic and RF products from AA OPTO-ELECTRONIC

NEED AN ACOUSTO-OPTIC PULSE PICKER?

What do you need? High speed, High power, High stability, Fibre pigtailed...?

AA OPTO-ELECTRONIC will propose you a suitable solution.

AA OPTO-ELECTRONIC: your suppliers of acousto-optic and RF drivers propose the most complete range of Acousto-optic devices covering wavelengths from 180 nm up to 11 μm , as well as all associated RF drivers and power amplifiers up to 1GHz and 500 Watts.

If you do not find a convenient product in our standard range,

please contact us for a custom design!!!!!!

AO Modulators from 180nm to 11000nm

Tunable filters from 350nm to 4000nm

Polychromatic modulators 400-650nm, 450-700nm, 700-1100nm

Pulse Pickers free space and fiber pigtailed down to 6ns rise time

Deflectors 1 axis and 2 axis, resolution up to >1000 dots

Fiber pigtailed devices from 400 nm up to 2100 nm

Frequency Shifters fixed and variable

MODA drivers fixed frequency

VCO drivers

DDS drivers

Power Amplifiers
